

Postdoctoral Training Opportunity

Sponsored by the American Heart Association, the Magee-Womens Research Institute and the University of Pittsburgh are pleased to announce a **“Go Red” Multi-Disciplinary Research Fellowship in Women’s Cardiovascular Health**. Our fellowship examines the impact of pregnancy and pregnancy outcomes on women’s subsequent risk and responsible mechanisms for hypertension, cardiometabolic disorders and heart disease with clinical, basic and population strategies. The role of the placenta in these mechanisms is a topic of intense interest. The training duration is 2 years, with training opportunities for MDs, and PhD trained basic scientists and epidemiologists. Fellows will receive a competitive stipend in a rich educational and training environment, with opportunities to network with 4 other AHA “Go Red” centers across the country. Candidates must be US citizens or permanent residents. Positions are available immediately until April 2018. More information on this fellowship and our research center can be found by contacting the fellowship coordinator, Ms. Lee Rager, srager@mwri.magee.edu. and our website <https://ahafellowship.wordpress.com>.
