

**Postdoctoral Fellow/Senior Scientist Position – Placental
Development/Pregnancy Research**

A postdoctoral fellow/Senior Scientist position is available in the Perinatal Research Program in the Department of Obstetrics and Gynecology, Wayne State University School of Medicine, to study placental development, immunology of the maternal-fetal interface, and the vascular complications associated with various pregnancy disorders. Applicants must have a PhD or equivalent degree. Research experience in areas of tissue-specific gene targeting, transgenic design, immunology, developmental biology, and placental development is desired. Applicants for the Senior Scientist position should have at least five years of postdoctoral training experience and excellent manuscript/grant/scientific writing skills. Competitive salary and benefits will be provided and the positions are available immediately. Interested applicants should send a curriculum vitae, statement of research interests, and names of three references by email to: Nihar R. Nayak, DVM, PhD, Department of Obstetrics and Gynecology, Wayne State University School of Medicine; email: nnayak@med.wayne.edu.
